CONDITIONING MASSAGE

サイバーリラックス

CYBER-RELAX

FUJI MEDICAL INSTRUMENTS MFG.CO.,LTD.

A whole new massage experience that allows both body and mind to be at their best.

There have been dramatic changes in the way we live and work all over the world. Various types of fatigue and environmental changes can also cause mental stress. In order to be active every day and be at one's very best, it is necessary to take care of both body and mind.

CONDITIONING MASSAGE

A conditioning massage created to take care and tune up physical, mental and health state.

1

Massage care through AI analysis

BODYCARE

- Foot sole Shiatsu
- 38 Course Menus
- User Customize Mode

2

Leading to the best state

BALANCE

Using a variety of stretches to adjust and balance the muscles.

- Air Massage
- 5 Full Body Stretch Menus
- 6 Body Parts focused Stretch Menus

3

A relaxing experience for both Body and Mind

BEING

Creating moments of relax to take care of the mental state.

- Mindfulness Course
- Total Relax Position
- Double Heating
- Bluetooth® Supporting Speakers

BODYCARE

To obtain the best bodycare, the accurate AI sensing technology allows to optimize the massage according to each user.

5D-AI PLUS

Fujiiryoki AI Technology

Through the AI, the control system automatically passes the user's body shape, muscles status and other information into the massage. Intensity, techniques, smoothness are adjusted and implemented according to each user.

AI By detecting 8 backline massage points, it's possible to automatically optimize and adjust the massage according to the user.

NEW AI Double Sensing +

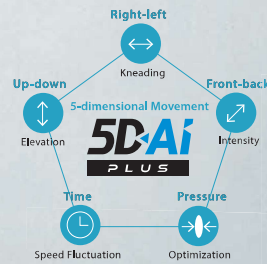

The "Shoulder Position Detection System", which detects the position of the shoulders, calculates the massage point, then the "Backline Detection System" detects the backline by measuring 8 different points along the spine. The 5D-AI movement PLUS automatically adjusts itself along this spinal curve to achieve the most comfortable massage.

AI The two kneading balls mecha has been cultivated by Fujiiryoki for more than 20 years. Fine and efficient, Japanese quality kneading is achieved through the AI.

NEW 5D-AI Mecha PLUS

Through the AI control of kneading and a high-precision motor, the past mechanical movements have been successfully upgraded into a real hand-like, smooth massage. Moreover, intensity is adjusted according to the muscle state of each person in real time to relieve body stiffness with a stable and on-point massage.

Kneading action of 5D-AI Mecha

Foot Sole Shiatsu

The airbag keeps ankle and instep in place, as if a hand grips the foot, and then a special roller massages the sole of the foot.

Foot Roller Massage

By regulating the strength of the air bag holding ankle and instep, the intensity of the foot roller can be adjusted in three levels. According to preferences, the foot roller can also be turned off.

Footrest Perfect Fit

The double sliding mechanism (electric and spring) allows to accommodate various users heights and leg types.

⑧ Shiatsu is here used to describe the roller movements

38 Course Menus creating a special experience every day

A rich offer to satisfy all preferences, as it's possible to choose among 38 courses, 23 automatic and 15 part-focused ones.

The large screen is easy to read and operate 4.3" Full Color Touch Screen Remote Control

An easy-to-understand voice guidance helps with each operation step.
Voice Guidance Function

The impressive number of menus allows to choose the massage course according to daily fatigue levels.
23 Types of Automatic Courses

	Tapping Spiral Knead <small>NEW</small> Using small circular motions to knead and soothe stiff muscles, then tapping to loosen them.

A customized massage chair to suit each user preferences

NEW User Customized Mode

User's shoulders position, back line, airbags intensity and reclining angle can all be registered.

step 1 Body Shape Information Detection

AI Double Sensing +

Thanks to the "Shoulder Position Detection System", which detects the position of the shoulders, and the "S-line Detection System", which detects the back line, the AI is able to optimize the massage points automatically.

step 2 Registration of Kneading Intensity from Shoulders to Hips

Customized Back Line

Based to the detected back line, a uniform massage is applied from the shoulders to the buttocks. In addition, the kneading intensity of each of the 8 back line points can be adjusted according to preferences.

step 3 Registration of Most Relaxing Position

Customized Reclining Angle

Any position deemed to be comfortable by the user will be reflected and registered into all programs. The reclining angle can be adjusted according to preferences.

step 4 Adjustment of Air Massage Intensity

Customized Air Massage

The intensity of each of the airbags that massage 8 different parts of the body can be registered independently, in real time.

BALANCE

A massage that relaxes and stretches the muscles, creating a body that is balanced and less likely to feel fatigued.

Through a carefully calculated airbag configuration and a fine strength adjustment function, the air massage perfectly fits the whole body.

High-efficiency Air Pressure System

The strength of the airbags can be adjusted in 7 levels for 8 parts of the body. It's possible to experience the Pulse Mode, that with very regular action promotes blood circulation, as well as the Air Massage Mode, that through different speeds imitates a real hand massage.

Exclusive Function **High-speed Inflation Airbag System**
The built-in high-flow and high-pressure air pump allows the high-capacity airbags to operate powerfully, enhancing the massage effect.

Airbags
8 Body Regions
7 Levels Intensity Adjustment

Stretching and relaxing muscle tension of the whole body and of single body parts for a perfect tune-up.

Diverse Stretching Menus

5 Types of Full Body Stretch

Stretching that carefully tunes up the whole body (30 minutes)
■ Conditioning Course

Everyday full-body Stretch Menu (18 minutes)
■ Technical Stretch ■ Extreme Whole Body Stretch
■ Whole Body Stretch ■ Whole Body Air

6 Types of Region-focused Stretch

- 1 Neck Stretch
- 2 Shoulder Stretch **NEW**
Stretch menu for shoulders, obtained through lifting up and releasing movements.
- 3 Back Stretch
- 4 Waist Stretch
- 5 Arch Stretch **NEW**
Menu that slowly bends and stretches the upper body
- 6 Leg/Knee Stretch **NEW**
Stretch menu that focuses on the knees

Power Stretch
Exclusive Function **Double Stretch**
While pelvis and legs are kept in place through the airbags, the legs are also pulled forward and downward, stretching the body and relieving muscles stiffness.
Exclusive Functions **Knee Stretch** | **Legs Stretch**

BEING

Creating moments of relaxation and enjoyment to bring tranquility to the mind and guide the body to its best-performing state.

Bluetooth® Supporting Speakers

Specially designed left and right bass-reflex speakers are placed near the ears to achieve a luxurious sound-surrounded space.

Clear Voice Sounds

Stereo Sound

Rich Output Sound Range

Built-in Multi-band Equalizer

Built-in DSP Digital Speakers

Full-range Speakers

The Bluetooth® typeface and logo are registered trademarks of Bluetooth SIG, Inc. and Fujiiryoki Ltd. is authorized to use the above marks. All other trademarks and company names are the property of their respective owners.

Double Heating

Two heating systems are built in to create a more comfortable massage time.

Foot Sole Heating

Gently warming up the feet, which tend to get cold easily.

*The warming function can be used independently.
*Set temperature: about 43 degrees (set temperature is different from perceived temperature.)

Exclusive Function

Quick-Heat Multi-heaters

The pads with built-in warming function can be placed behind the back to warm up around the waist, or can be unzipped and placed on the front to warm around the abdomen.

NEW Mindfulness Course [automatic]

Based on the concept of "meditation", a 30-minute massage performed through airbags only. The slow air massage carefully and gently soothes the entire body.

NEW Total Relax Position

The relaxation level is enhanced by the comfortable lying position, also perfect to optimize the stretching effects. You can actually feel the stretching effect.
